

Company Profile

Your Operational Technology Partner

Automation • Electrical • Instrumentation- Digital-Cybersecurity

INTRODUCTION

Easy Automation Engineering stands as a distinguished system integrator and industrial automation leader globally. With over a year of expertise, we've provided cutting-edge solutions in instrumentation, control, and electrical automation to top-tier oil & gas corporations. Our unique approach combines a vast portfolio of automation solutions, deep technical prowess across all major OEMs, and a tailored, asset-specific solution design.

As we embrace Industry 4.0, our focus has shifted towards Industrial IoT and digitalization, evolving from project-based to partnership-driven solutions, fostering long-term collaborations with technology partners and clients to deliver efficient, innovative solutions.

- Our strength lies in combining deep technical expertise with hands-on field experience, enabling us to design, integrate, and optimize systems that drive efficiency, safety, and productivity. From concept to commissioning, our team works closely with clients to ensure seamless project execution and sustainable results.

- Backed by a culture of teamwork, continuous learning, and commitment to excellence, Easy Automation Engineering is shaping the future of industrial technology with smart solutions tailored to every client's operational needs.

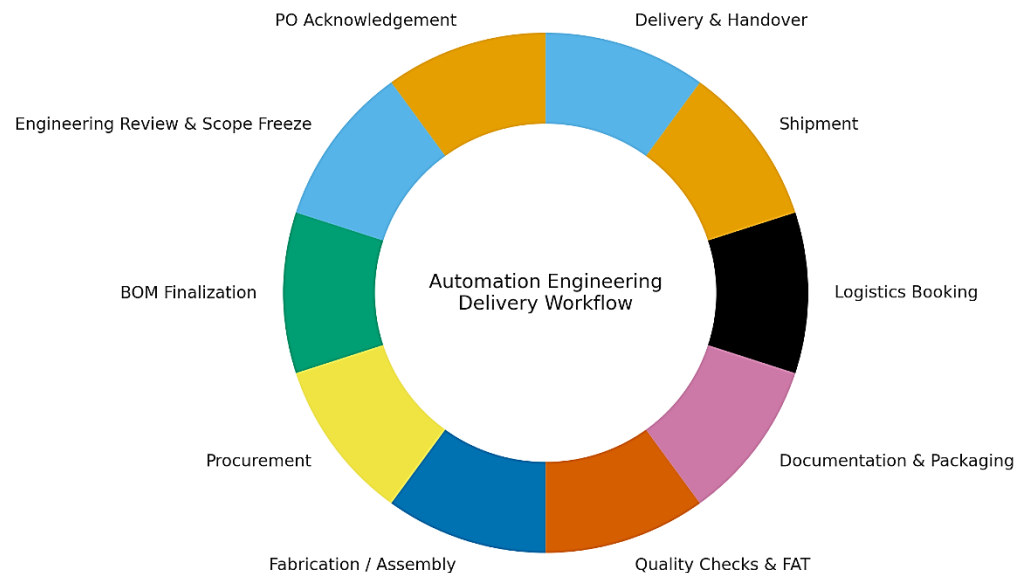

EASY AUTOMATION flexible approach to instrumentation and control systems allows clients to select components that are perfectly suited to their needs without sacrificing quality, value, or crucially, the ability to work seamlessly together.

WHAT SETS **EASY** AUTOMATION APART

- Rapid and efficient delivery
- Unbiased, optimal solution selection
- Wide-ranging clientele
- Unwavering commitment to quality

- **On-Time Delivery Guarantee:** EASY AUTOMATION Engineering ensures your project timelines are always met, thanks to our steadfast commitment to punctuality.
- **Streamlined Process & Real-Time Tracking:** Our advanced management and tracking systems keep you informed and confident from order to delivery.
- **Customized Solutions & Quality Assurance:** Tailored engineering solutions meet your specific needs without compromising on quality.
- **Proactive Support & Expertise:** With our proactive customer service and extensive expertise, we tackle potential issues early, ensuring smooth delivery every time.

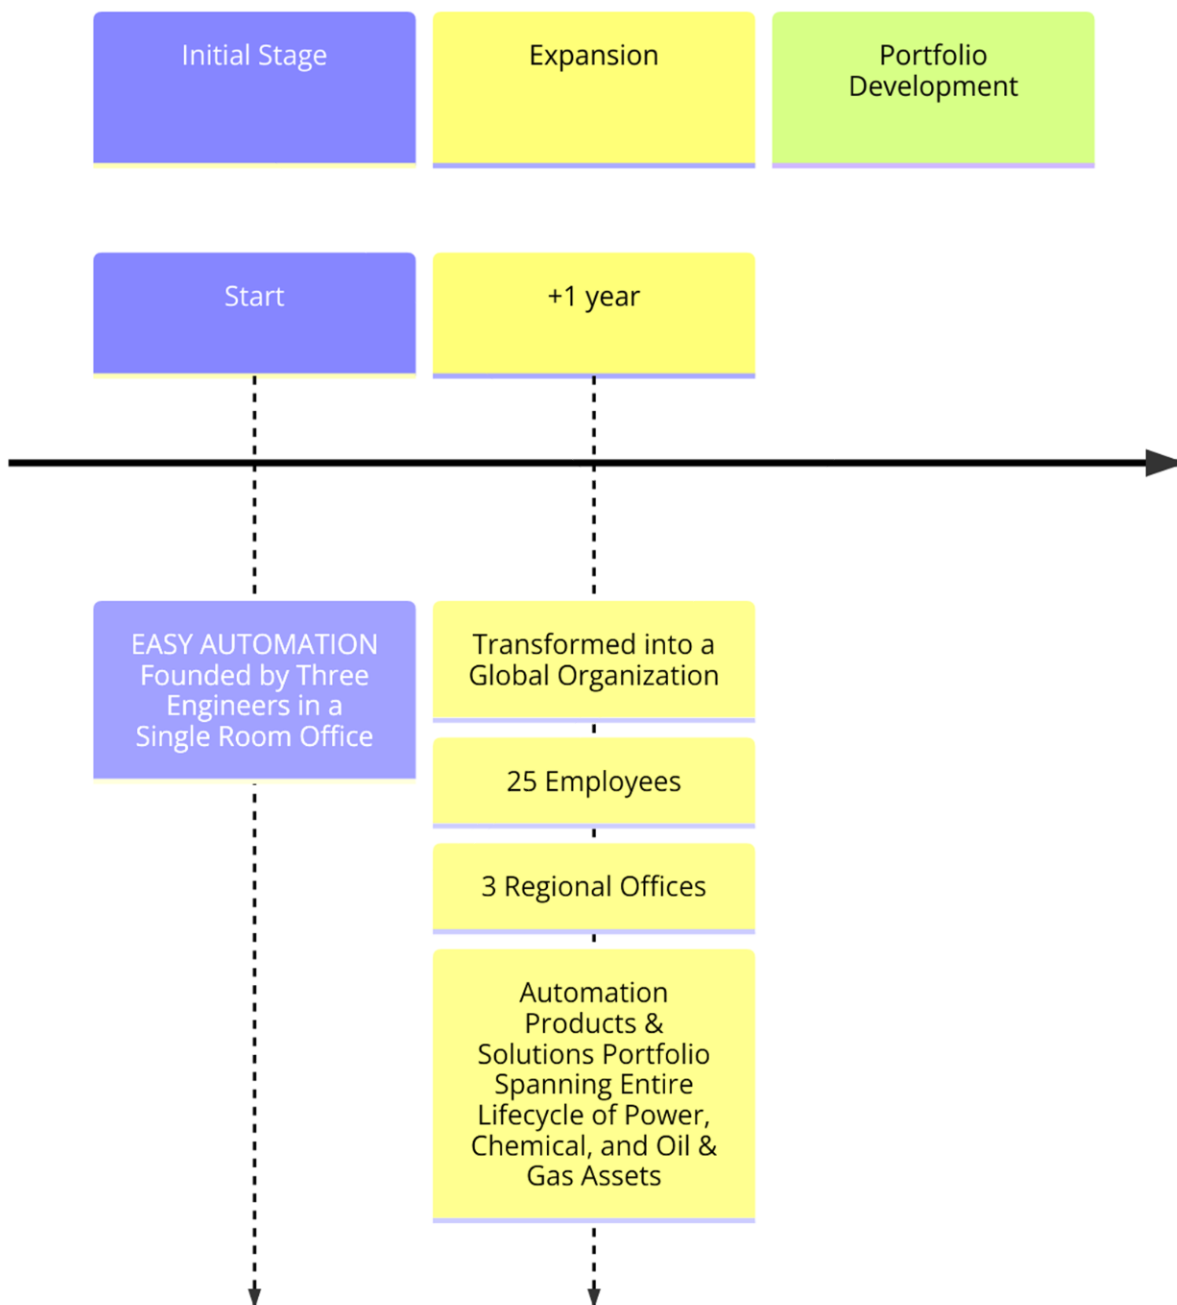

EASY AUTOMATION guarantees uninterrupted delivery, prioritizing customer satisfaction and a flexible approach to vendor selection. We stand firm on our commitment to uphold the highest standards of ethical integrity.

HISTORY

EASY AUTOMATION started as an entrepreneurial venture with three engineers and a single room office. Over the course of more than a year's it has transformed into a global organization with 25

employees, 3 regional offices and an automation products & solutions portfolio that spans the entire lifecycle of an, power, chemical and oil & gas asset.

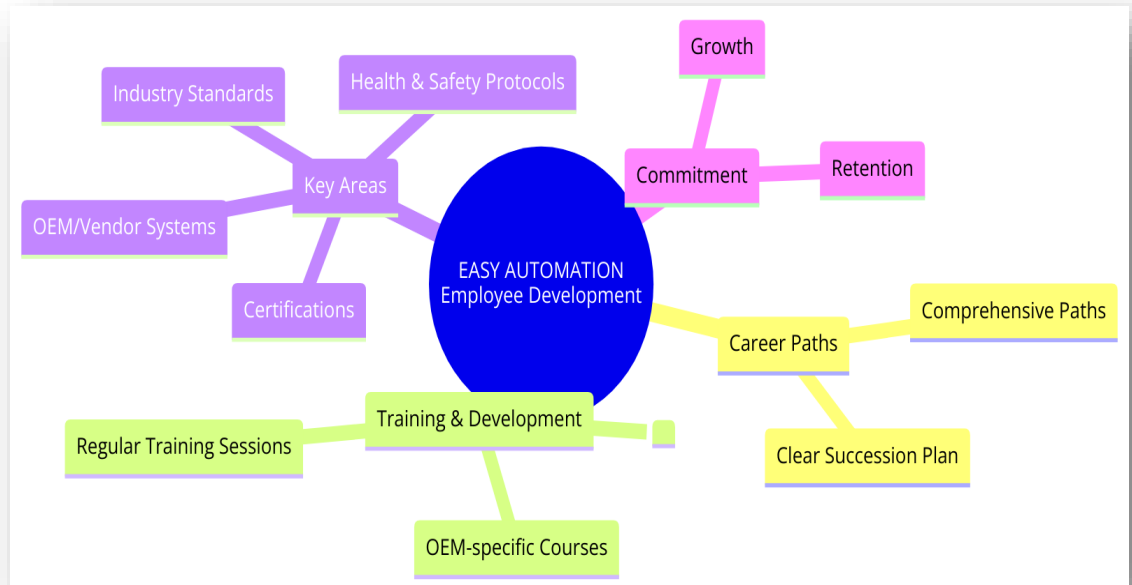

EASY AUTOMATION Growth Timeline

ENGINEERING AND DESIGN

At EASY AUTOMATION, employee development is a cornerstone of our success. We provide comprehensive career paths and ongoing training & development initiatives. This includes regular training sessions, OEM-specific courses, and a clear succession plan, ensuring our team remains at the forefront of industry and technological advancements.

Each engineer benefits from over 20 internal and external training programs annually, covering OEM/vendor systems, industry standards, certifications, and health and safety protocols, underscoring our commitment to employee growth and retention.

IIoT Division

Project Controls

Proposal engineer

Project Manager

VDesign and Application Engineer

Control System, I&E Designers

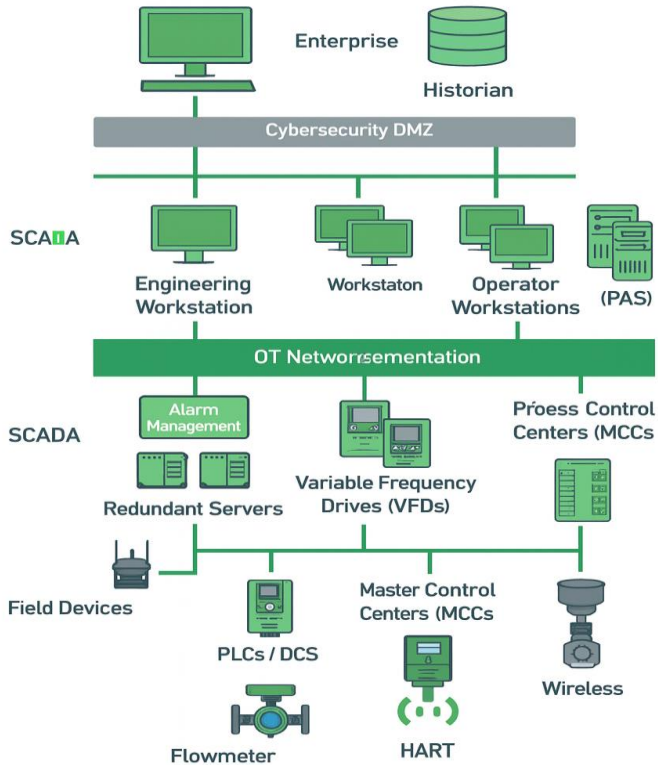

EASY AUTOMATION boasts an impressive manufacturing facility dedicated to switchgear, along with a wide array of general electrical and automation products. This state-of-the-art factory underscores our commitment to quality and innovation in the industry.

MANUFACTURING FACILITY

- **INDUSTRIAL PANELS /DB BOX**
- **CABLE TRAYS**

EASY AUTOMATION

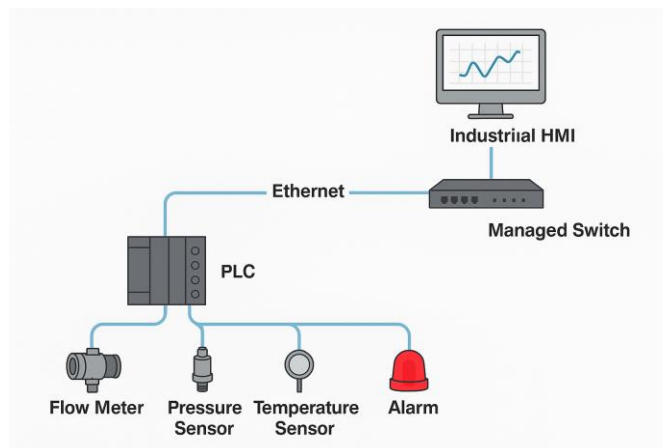

EASY AUTOMATION Engineering Integrated Control Systems consolidate control, automation, cybersecurity, and power management into a unified solution. With a vendor-neutral stance, clients benefit from top-tier components without sacrificing system synergy and performance.

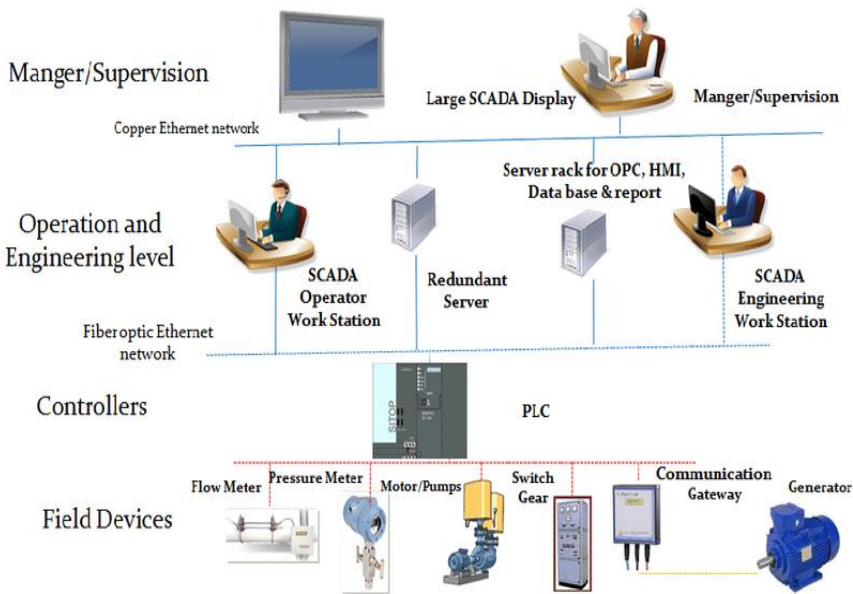

EASY AUTOMATION ICS offerings span the entire project lifecycle, including engineering, design, procurement, installation, and commissioning, ensuring comprehensive support and optimization.

1. Process Control Systems
2. Safety Instrumented Systems
3. Fire & Gas Systems
4. Control, Electrical, & Instrumentation Construction
5. Engineering Study & Design
6. Instrument Asset Management System

Scada Solutions

EASY AUTOMATION supplies Remote Terminal Units and controllers specifically built for operation in harsh environments. Our engineering offices and manufacturing facilities work together to customize solutions for each site's conditions.

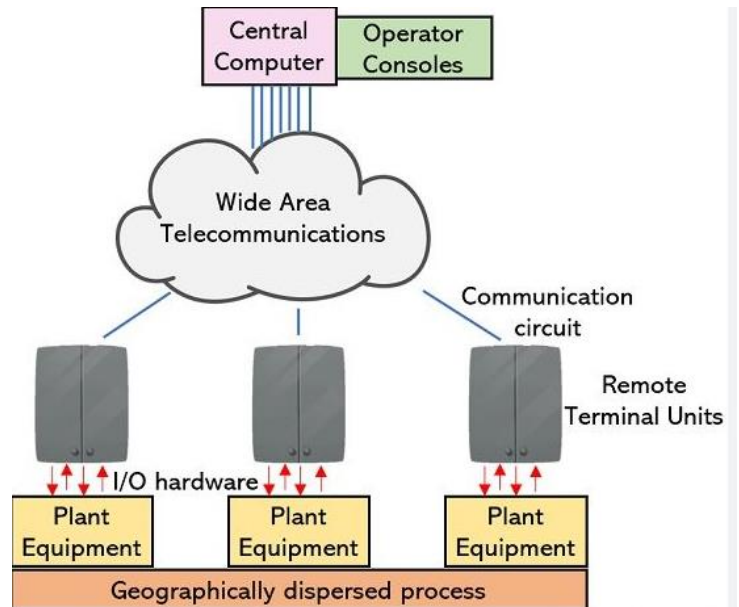

We also develop custom-built Human Machine Interfaces (HMIs) that are intuitive to use and match directly to plant, wellhead or pipeline operations.

Our detailed operation views enable real-time operator-access to all relevant information. We integrate with data historians and Alarm & Event (A&E) repositories to facilitate activity

Our vendor-neutral approach ensures that EASY AUTOMATION SCADA solutions seamlessly integrate with any Proportional-Integral-Derivative (PID), Programmable Logic Controller (PLC), and Distributed Control System (DCS) whether standalone or part of a Central Control Room (CCR) infrastructure.

Our SCADA Solutions cover:

- Plant SCADA
- Pipeline SCADA
- Wellhead SCADA
- Telecommunication, CCTV, and Security Solutions

EASY AUTOMATION field services specialize in ensuring long-term asset health through comprehensive maintenance and upgrade services. They offer a significant edge by leveraging project experience and systems knowledge, outperforming third-party O&M providers in reducing risks and costs.

Their expertise across multi-vendor control systems simplifies service management, eliminating the need to juggle multiple teams. With EASY AUTOMATION, clients benefit from streamlined operations, as a single resource can adeptly manage multiple systems, leading to cost and time savings.

Services Scope

1. Resident Operations & Maintenance
2. On-Call Operations & Maintenance
3. Remote Operations & Maintenance
4. Facility Surveys & Troubleshooting
5. Operations & Maintenance Training
6. Commissioning & Integration Services

EASY AUTOMATION excels in executing Greenfield projects, particularly in environments with limited access to essential resources like energy and infrastructure. As a skilled system integrator, we offer both electrical and power solutions, alongside advanced automation and control solutions. This integrated approach ensures a seamless project delivery experience, regardless of the global location, overcoming the typical challenges faced in developing new sites from scratch.

1. Control/Electrical Buildings & Skids Engineering
2. Coordination Studies Switchgears and Motor Control
3. Centers Power Management & Distribution Systems 1

- EASY AUTOMATION has successfully implemented PI-based Plant Historians across 49 DCP locations, facilitating centralized data accumulation at the headquarters for real-time trend analysis
- We successfully implemented a Remote PI System Visualization and DMZ configuration at a gas plant. This project involved the engineering of a PI system tag database, ensuring connectivity and validation for over 20,000 pipeline data tags within an existing Siemens PCS7 system.

- EASY AUTOMATION undertook an advanced alarm system enhancement project at a gas plant, focusing on augmenting safety, reliability, and profitability. This meticulous process and dedication to refining the alarm system's efficiency resulted in a remarkable 60% reduction in alarm frequency, demonstrating our commitment to operational excellence and safety advancements.

Execution Methodology

EASY AUTOMATION project execution approach prioritizes fulfilling client requirements efficiently and within set timelines. Our strength originates from our regionally based, technically skilled teams dedicated to managing customer relations and overseeing projects from initiation to completion. Collaborating with our engineering offices ensures that our solutions adhere to international standards and comply with legal regulations.

Moreover, our engineering teams maintain close ties with clients and suppliers to keep pace with industry innovations. Our strategically positioned manufacturing sites facilitate swift global project delivery, underscoring our commitment to excellence and client satisfaction.

Project Initiation

1. Customer engagement & scope definition
2. Engineering, design, project management
3. Regional supply chain management

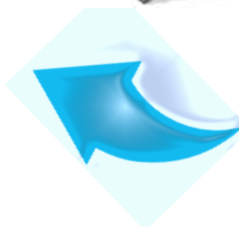

Engineering Office

1. Procurement
2. Technical support and sharing
3. global best practices

Project Delivery

1. Installation and commissioning
2. SAT
3. Long-term maintenance and
4. after-sales support

Manufacturing Facilities

1. Panel manufacturing
2. Internal QA and FAT

Process Automation: EASY AUTOMATION excels in creating intelligent automation systems that optimize industrial processes, improve efficiency, and reduce operational costs.

Digital Solutions: We leverage the power of IoT, AI, and analytics to transform data into actionable insights, driving digital transformation across industries.

Engineering Services: Our comprehensive engineering services span from conceptual design to project implementation and maintenance, ensuring reliability and performance.

Industrial Analytics

EASY AUTOMATION provides data integration and management solutions that cover all stages of your operations from greenfield installations to legacy and brownfield upgrades

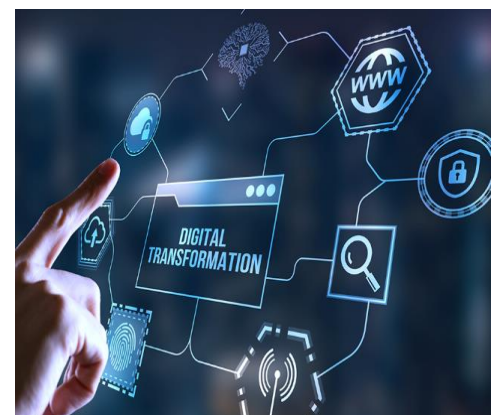

IoT Cybersecurity

We offer secure design and implementation of cybersecurity for operational-technology (OT) systems and networks at industrial plants, facilities, and remote sites.

Digital Operations Management

EASY AUTOMATION has partnered with leading technology innovators and specialized operations solution providers around the world to build a

EASY AUTOMATION reputation for excellence is grounded in our relentless pursuit of product and service enhancement, ensuring adherence to global standards and client specifications. Our rigorous internal procedures and frameworks are designed to uphold quality across all operations, monitored closely by Country Managers and regional QHSE Leads.

Commitment to customer satisfaction is paramount, with project team evaluations directly linked to feedback scores. Through thorough stakeholder feedback, root causes of issues are identified, leading to informed corrective actions. We, holding certifications from numerous international bodies, consistently aligns with industry-leading quality standards.

Exceeding expectations, EASY AUTOMATION redefines excellence, merging cutting-edge technology with top-tier quality standards

Enabling Your Business Evolution

For years, EASY AUTOMATION ENGINEERING has been at the forefront of enhancing operational efficiency for industrial enterprises, improving process visibility, control, and reliability across plants and assets. As we navigate the fast-paced digital era, we are committed to partnering with you, leveraging AI-driven insights and analytics to unlock the full potential of your facilities with unparalleled enterprise visibility.
